

EDUCATION

Carnegie Mellon University

Pittsburgh, Pennsylvania

Master of Science in Information Networking

Jan. 2023 – Dec. 2024

- **GPA: 4.0** | Relevant Courses: Intro to Computer Systems, Distributed Systems, Storage Systems, OS Design and Implementation, Parallel Computer Architecture and Programming, Fundamentals of Telecommunications Networks, Intro to ML, NLP.
- **Leadership:** TA for NLP Course (11-411/611); President of Graduate Organization @INI; Graduate Student Assembly Rep.

Fudan University

Shanghai, China

Bachelor of Science in Computer Science

Sep. 2018 – Jun. 2022

- **Awards:** Excellent Graduate of Fudan University, 2022; Outstanding Student Scholarship (2018 – 2022).
- **Competitions:** Silver Medal, ICPC Asia-East Continent Final Contest; Gold Medal, ICPC Asia Regional (Shanghai 2020).
- **Publication:** “*Understanding the User Interactions on GitHub: A Social Network Perspective*”, CSCWD’21.

PROFESSIONAL EXPERIENCE

Google (YouTube)

San Bruno, California

Software Engineer

Mar. 2025 – Present

- Working in YouTube’s Community Intelligence, responsible for recommending high-quality comments, posts and communities.

Apple (AIML – Siri and Information Intelligence)

Seattle, Washington

Software Engineering Intern

May 2024 – Aug. 2024

- Worked on the projects focusing on improving cross device experience for Siri using Swift and Objective C.
- Improved Siri reliability by redesigning and implementing the request flow, expanding use cases, and optimizing performance.
- Maintained and iterated an internal tool designed for collecting feedback from Apple employees with Swift and SwiftUI.

Bilibili

Shanghai, China

Machine Learning Engineer Intern

May 2021 – Jun. 2022

- Maintained the recommender system in C/C++, handling over 1 billion daily requests, focusing on re-ranking and diversity control.
- Innovated three approaches to match candidates for the recommender system, boosting CTR by 1%, 3%, and 1%, respectively:
 - Identified potential episodes from video series by analyzing patterns in video titles using sequence-to-sequence models.
 - Applied GNN to find related videos with similar embeddings using data processed by Airflow, MapReduce, and Bash.
 - Utilized BERT model in TensorFlow with HNSW algorithm to match cold-start videos having similar titles.
- Established BI for the rec system with Presto and Hive, providing data support for company-level user-growth strategy meetings.

ByteDance

Shanghai, China

Software Engineer Intern

Jan. 2021 – Apr. 2021

- Improved feed request access across platforms (*TikTok*, *Douyin*, etc.) to the advertising system's landing page optimization service using C/C++ on Linux servers, resulting in a 1% higher conversion rate and enhancing user experiences.

SKILLS

- **Programming Languages & Tools:** C/C++, Python, Java, CUDA, Swift, Go, Objective C, PyTorch, TensorFlow, Linux, Git, Bash
- **Data Technologies:** MySQL, Redis, Neo4j, Hadoop (HDFS, MapReduce), Hive, Presto, Airflow, Kafka, Storm, Zookeeper

PROJECTS

CloudFS: Hybrid Cloud-Backed Filesystem

Storage Systems, Fall 2024

- Developed a FUSE-based filesystem integrating local SSD with cloud storage, enabling scalable, cost-efficient, and transparency.
- Implemented content-based deduplication, snapshot functionality to minimize redundant uploads, lower bandwidth usage.
- Optimized performance and reduced latency with a persistent cache, balancing cloud interactions and local SSD utilization.

🌀 Pebbles Kernel and Paravirtualization *Operating System Design and Implementation, Spring 2024*

- Implemented a Unix-like kernel from scratch, supporting multiple virtual memory address via paging, preemptive multitasking, and a set of important system calls, and supplying device drivers for the keyboard, the console and the timer.
- Wrote a user-level thread library based on the kernel, including synchronization primitives such as mutexes and condition variables.

SELECTED AWARD

- Dec. 2016 - **First Prize** of the National Olympiad in Informatics in Provinces (NOIP 2016)
